Personal Data:

- **Date of birth:** January 13, 1986
- **Place of Birth:** Rho (Milano)
- **Nationality:** Italian
- **Work Address:**
Department of Electronics and Telecommunications (DET)
Corso Duca degli Abruzzi, 24, 10129 Torino, ITALY

Current position:

- **Jan. 2019- Assistant Professor** at the Department of Electronics and Telecommunications of Politecnico di Torino, Italy.
- Main research interests: Optical Networks, Networked Music Performance.

Previous positions:

- **Sept. 2015- Dec. 2018, Researcher** at Dalle Molle Institute for Artificial Intelligence (IDSIA), Scuola universitaria professionale della Svizzera italiana (SUPSI), Università della Svizzera italiana (USI), Lugano, Switzerland
- **Jan. 2014- Aug. 2015, Postdoctoral Researcher** at Dept. of Electronics, Information and Bioengineering, Politecnico di Milano, Italy

Education:

- **European PhD degree in Information Engineering (High Qualification Program jointly erogated by Politecnico di Milano, Politecnico di Torino and Politecnico di Bari)**
Jan. 2011 - Dec. 2013, Politecnico di Milano
 - Thesis title: “Privacy Preserving Data Collection in the Automatic Metering Infrastructure of Smart Grids”
 - Supported by Fondazione Ugo Bordoni and Scuola Interpolitecnica di Dottorato
- **Master degree in Telecommunications Engineering**
Sept. 2008 - Oct. 2010, Politecnico di Milano
 - Master Thesis Title: “Internet traffic classification with per-source attributes”. Final grade: 110/110 cum laude
- **Bachelor degree in Telecommunications Engineering**
Sept. 2005 - Jul. 2008, Politecnico di Milano
 - Bachelor Thesis Title: “Electrical bistability phenomena in diphenyl-bitiophene-based devices”. Final grade: 110/110 cum laude
- **Scientific School Certificate**
Sept. 2000 - Jul. 2005, Liceo Scientifico “G. Galilei” in Legnano (MI) Italy
 - Final grade: 100/100

Professional and Research Experiences:

- **Visiting PhD Student/Postdoctoral Researcher**, INRIA, Institut National de Recherche en Informatique et en Automatique (Sophia Antipolis, France), *Nov. 2013, Apr. - May 2014*
- **Visiting PhD Student**, AISEC, Fraunhofer Research Intitution for Applied and Integrated Security (Munich, Germany), *Feb. 2012 - Apr. 2012, Sept. 2012 - Feb. 2013*
- **Project collaboration**, Alcatel-Lucent, Optics Division, Vimercate (Italy), *Sept. 2011 - Sept. 2012*

In the last years I've been responsible for co-tutoring 7 master students (Marco Savi, Daniele Polenghi, Giulia Mauri, Alessandro Panzeri, Constantin Yagne, Simone Fontana, Hani El Khoury). I wrote or co-authored more than 60 papers in the area of Smart Grid energy management and communication security, optical network planning, networked music performance and Internet traffic classification.

I have been serving as reviewer for several international conferences and and journals in the areas of Telecommunications and Smart Grids. From July 2015 to April 2018 I served as Newsletter Editor for the IEEE STC on Sustainable computing (<http://stc-sustainable-computing.ieee.net/>), which I am still currently serving as Vice-Chair. Since October 2016 I also serve as Associate Editor for *IEEE Access*.

I have served as project proposal reviewer for the French National research Agency (ANR) 2017 generic call, panel CE25 (networks, high performance computing and storage) and for the Research Foundation - Flanders (Fonds Wetenschappelijk Onderzoek - Vlaanderen, FWO), 2018 Postdoctoral Fellow call.

I was Technical Program Committee member for the following conferences:

- *ICGREEN 2015, Fourth International Conference on Green IT Solutions*, Milan, Italy, July 9-10th 2015
- *2016 Greenmetrics Workshop*, in conjunction with *ACM Sigmetrics*, Antibes, France, June 14-18 2016
- *2017 Greenmetrics Workshop*, in conjunction with *ACM Sigmetrics*, Urbana-Champaign, Illinois, June 5 2017

- *2017 CySWater, 3rd International Workshop on Cyber-Physical Systems for Smart Water Networks*, in conjunction with *CPS Week 2017* Pittsburg, PA, April 2017
- *9th International Conference on Applied Operational Research - ICAOR 2017*, Taiwan, 18-20 December 2017, also serving as chair for the co-located *Workshop on Big Data Analytics and Decision Science*
- *IEEE International Conference on Computing, Networking and Communications, QoS and System Modeling Symposium*; Maui, Hawaii, March 5-8 2018
- *2018 IEEE Summer Topical Meeting Series, Machine Learning-assisted Software-Defined Optical Networks topical meeting*; Waikaloa, Hawaii, July 9-11 2018
- *2018 CySWater, 4th International Workshop on Cyber-Physical Systems for Smart Water Networks*, in conjunction with *CPS Week 2018* Porto, Portugal, April 2018
- *2018 GLOBECOM, Selected Areas in Communications: Smart Grid and Power Line Communications*, 9-13 December 2018, Abu Dhabi, UAE
- *2018 ONDM, 22th International Conference on Optical Network Design and Modeling*, 14-17 May 2018, Dublin, Ireland
- *VTC2018 Fall, IEEE 88th Vehicular Technology Conference*, 27-30 August 2018, Chicago, USA
- *IEEE International Conference on Computing, Networking and Communications, QoS and System Modeling Symposium*; Honolulu, Hawaii, February 19-21 2019
- *ONDM 2019, 23rd International Conference on Optical Network Design and Modeling*, 13-16 May 2019, Athens, Greece
- *2019 GLOBECOM, Selected Areas in Communications: Smart Grid Communications*, 9-13 December 2019, Waikoloa, HI, USA Athens, Greece

I am/have been involved in the following European research projects:

- *SmarrH2O: a European Project on Water Sustainability* (2014-2016)
- *EnCOMPASS: Collaborative Recommendations, Visualisation and Adaptive Control for Personalised Energy Saving* (2017-2019)

Research Activities:

My main fields of research are *energy management and communication security in Smart Grids*, *optical network design*, *networked music performance* and *Internet traffic analysis and classification*.

Communication privacy and security in Smart Grids Privacy of user-related data is of paramount importance in Smart Grid scenarios: the increasing diffusion of Automatic Meter Reading (AMR) and the possibility to open the system to third party services has raised many concerns about the protection of personal data related to energy consumption. On one side, information regarding customers' personal habits can be inferred by analyzing metering data; on the other side, detailed knowledge of consumption measurements is crucial for the timely management of energy distribution, provisioning, and forecasting. Current research topics:

- *Privacy-friendly data aggregation and anonymization in the automatic metering infrastructure of Smart Grids*: Design of privacy-preserving infrastructures and communication protocols for the secure collection of metering data, which allow utilities and third parties to obtain time and/or space aggregated energy consumption measurements [18,23,25,26,57,59,60,63] or disaggregated but pseudonymized meter readings [24,61], thus making them unable to associate the individual measurements with the identity of the customer (i.e., the meter) that generated the data.
- *Privacy-friendly distributed optimization of energy consumption in Smart Grids*: Design of secure mechanisms and protocols enabling the distributed optimization of energy consumption without compromising the privacy of the users, with the aim of shaping the load profile of a neighborhood according to the local energy production by renewable sources [8,14,20,46,53,58,C1].

- *Privacy-friendly vehicle-to-grid interactions*: Development of mathematical models and heuristics to optimize the power exchange among the batteries of electric vehicles and the smart grid, taking into account the constraints introduced by the power grid infrastructure and the dynamic and partially unpredictable trend of energy production and demand [17,52], as well as possible security and privacy implications [22,56].

Energy Management in Smart Buildings The incorporation of Smart technologies in buildings is considered as the key factor for the achievement of the objectives of energy efficiency, integration of Renewable Energy Sources, and reduction in the emissions of pollutants. The research activity is aimed at the design of energy management frameworks for residential and campus buildings [9,10,13,15,36,41,44,45,50,51,C2]. The designed infrastructures provide effective management tools for the local schedule of the energy usage at the users' side, supporting the integration of distributed energy sources (e.g. photovoltaic and wind power plants), energy storage banks, and various categories of controllable loads (including water/heat pumps, Heating, Ventilating and Air Conditioning (HVAC) plants, and electric vehicles). Such local Energy Management Systems must ensure to the users quality of service guarantees while enabling Automatic Demand Response with variable energy tariffs and interactions between users and utilities/ grid operators in case of emergencies. To this aim, the frameworks must also include prediction models for energy production/consumption patterns and building thermal inertia based on weather forecasts and expectations about building occupation, and a system to collect human feedbacks about the perceived thermal comfort.

Optical network design The research activity investigates the benefits brought by the introduction of distance adaptive transceivers supporting multiple modulation formats and baud rates in flexible grid networks in terms of spectrum occupation and transceiver utilization. I have proposed methodological approaches for the design of architectures for optical ring metro networks and mesh backbone networks relying on Integer Linear Programming formulations for optimal network deployments, as well as heuristics and analytical bounds for near-to-the-optimum solutions [27,28,29,64]. Complexity analyses of the proposed formulations have also been performed [19,49,55]. The impact of usage of spatial division multiplexing by exploiting multimode/multicore optical fibers is currently under investigation [1,12,35,37,47,48], as well as Machine Learning approaches [2] for quality of transmission evaluation [7,32,33,43] and imprecise Markov chain models for performance evaluation of resource allocation policies [5,42].

Networked Music Performance Networked Music Performance promises to revolutionize music rehearsal and teaching by allowing multiple remote players to simultaneously perform together from different physical locations by means of an Internet connection over a telecommunication network. However, in order to reproduce realistic rehearsing conditions, multiple technical, psycho-cognitive and purely musical issues must be addressed. In particular, at network level, very strict requirements in terms of latency and jitter must be satisfied to keep the one-way end-to-end transmission delay below a few tens of milliseconds. This research aims at investigating how the timbral characteristics of the instruments and the rhythmic complexity of the performed piece influence the musicians' performance. To this aim, psycho-acoustics have been performed by modeling the end-to-end (local microphone to remote speaker) channel, considering signal analog/digital conversion, signal codec, signal packetization, signal transmission and the computer real-time-processing limitation [11,16].

Internet traffic analysis and classification Internet traffic classification techniques aim at associating to a packet sequence between two hosts and two corresponding transport ports (flow) the generating application. The research activity is focused on the design of statistical classifiers aimed at discriminating different categories of Internet traffic, relying only on statistical attributes of the traffic flows/sources [30,66,67,68,69], thus complementing the more intrusive Deep Packet Inspection techniques. Moreover, analyses on network neutrality preservation in the collection of crowdsourced traffic measurements and in the management of content caches have been conducted [3,6,31,40].

Teaching Activity:

The following courses have been taught at “Politecnico di Milano”

- *Spring 2011, 2013, 2014* Teaching assistant in the undergraduated course *Network Software Platforms*
- *Spring 2012, 2013, 2014, 2016, 2017, 2018.* Teaching Assistant in the graduated course *Network Security and Cryptography*
- *Fall 2014, 2015, 2016, 2017, 2018.* Co-lecturer and teaching Assistant in the graduated course *Communication Networks for Electricity Systems*

Scholarships and Awards:

- *July 2018* Italian habilitation for Associate Professorship, Disciplinary Sector 09/F2 - Telecommunications (6 years validity)
- *July 2017* the paper “Differentially Private Queries in Crowdsourced Databases for Net Neutrality Violations Detection” by Maria Silvia Abba Legnazzi, Cristina Rottondi and Giacomo Verticale, receives the excellent paper award in *ICUFN 2017, The 9th International Conference on Ubiquitous and Future Networks*, Milan, Italy
- *June 2017* the paper “enCOMPASS - an Integrative Approach to Behavioural Change for Energy Saving” by Piero Fraternali, Sergio Herrera, Jasminko Novak, Mark Melenhorst, Dimitrios Tzovaras, Stelios Krinidis, Andrea Emilio Rizzoli, Cristina Rottondi and Francesca Cellina is best paper finalist in *1st Global IoT Summit*, Geneva, Switzerland
- *May 2017* the paper “QoT Estimation for Unestablished Lighpaths using Machine Learning” by Luca Barletta, Alessandro Giusti, Cristina Rottondi and Massimo Tornatore is within the top-ranked papers at *OFC/NFOEC*, Los Angeles Convention Center, Los Angeles, California, USA. Authors are invited to submit an extended version to *IEEE/OSA Journal of Optical Communications and Networking*
- *March 2017* the paper “Modelling Spectrum Assignment in a Two-Service Flexi-Grid Optical Link with Imprecise Continuous-Time Markov Chains” by Cristina Rottondi, Alexander Erreygers, Giacomo Verticale, and Jasper De Bock receives the best paper award in *DRCN 2017, IEEE International Conference on Design of Reliable Communication Networks*
- *November 2014* the paper “On the Complexity of Optimal Electric Vehicles Recharge Scheduling” by Cristina Rottondi, Giacomo Verticale, and Giovanni Neglia receives the best paper award in *Online GreenComm 2014, IEEE Online Conference on Green Communications*
- *March 2012* Golden medal as Best Master Student in Telecommunications Engineering for years 2008-2010
Donor: Prof. Giovanni Azzone, Dean of Politecnico di Milano
- *October 2010* Scholarship from “Famiglia Legnanese” Foundation
Donor: Education Department of Lombardy
- *May 2010* Golden medal as Best Bachelor Student in Telecommunications Engineering for years 2005-2008
Donor: Prof. Giulio Ballio, Dean of Politecnico di Milano
- *October 2009* Scholarship from “Famiglia Legnanese” Foundation
Donor: AMGA S.p.A., Legnano
- *October 2008* Scholarship from “Famiglia Legnanese” Foundation
Donor: F.lli. Cozzi S.p.A - Alfa Romeo, Legnano
- *October 2005* Scholarship from “Famiglia Legnanese” Foundation
Donor: Famiglia Legnanese, Legnano

Invited Talks:

- *September 19th, 2018*, invited talk “Optimized design of flexi-grid optical networks with SDM technologies”, PSC2018 - Photonics in Switching and Computing, Workshop “Space Division Multiplexed Optical Transmission”
- *September 17th, 2017*, invited talk “Machine learning-assisted routing and spectrum assignment in flexible optical networks”, 43rd European Conference on Optical Communications, Workshop “Opportunities for machine learning in optical communication: from components characterization, systems design and network optimization”
- *July 11th, 2016*, University of Pavia, Dept. of Industrial and Information Engineering, invited talk “Privacy Issues in the Automatic Metering Infrastructure of Smart Grids”, in International Summer School on Hybrid Microgrids

CS Skills:

Operating Systems: Windows 95/98/XP/Vista/7/10, Linux (user)

Programming: C, R, Matlab.

Applications: Microsoft Office

Operation Research: CPLEX, AMPL

Languages:

Italian: mother tongue

English: fluent. *Dec. 2006* First Certificate in English (B2 level) - grade A, received by British Council

German: good. *May 2005* Zertifikat Deutsch (B1 level) - grade A, received by Goethe-Institut Mailand

French: basic

Interests:

I am really fond of music: I started playing the piano at the age of 4 and I currently play also keyboard and organ. Since 2005 I have been singing as soprano in the polyphonic choir “Jubilate” of Legnano.

September 2000 “Theory and solfeggio” exam in the Academy of Music “Guido Cantelli” (Novara)

May 2010 Choir “Jubilate” receives the 3rd prize in the category Mixed Choirs at Varna European Grand Prix for Choral Singing (Bulgaria)

November 2016 Cristina Rottondi and Francesco Pasqualotto, “Ten Traditional German Songs Arranged for Piano”, Lulu Editions.

51. Cristina Rottondi, Markus Duchon, Dagmar Koss, Giacomo Verticale, and Bernhard Schaetz "An Energy Management System for a Smart Office Environment " *Workshop on Middleware for a Smarter Use of Electric Energy (MidSEE 2015)*, Cottbus, Germany, March 12th 2015
52. Cristina Rottondi, Giacomo Verticale, and Giovanni Neglia "On the Complexity of Optimal Electric Vehicles Recharge Scheduling", *Online GreenComm 2014, IEEE Online Conference on Green Communications*, November 2014
53. Cristina Rottondi, Antimo Barbato, and Giacomo Verticale, "A Privacy-Friendly Game-Theoretic Distributed Scheduling System for Domestic Appliances", *SmartGridComm 2014, IEEE International Conference on Smart Grid Communications*, Venice, Italy, November 2014
54. Cristina Rottondi, Alessandro Panzeri, Constantin Yagne, and Giacomo Verticale, "Mitigation of the Eclipse Attack in Chord Overlays", *International Workshop on Secure Peer-to-Peer Intelligent Networks Systems*, Hasselt, Belgium, June 2014
55. Massimo Tornatore, Cristina Rottondi, Annalisa Morea and Giuseppe Rizzelli "Complexity and Flexible Grid Networks" *OFC/NFOEC*, Moscone Center, San Francisco, California, USA, March 2014
56. Cristina Rottondi, Simone Fontana, and Giacomo Verticale, "A Privacy-friendly Framework for Vehicle-to-Grid Interactions" *Second Open EIT ICT Labs Workshop on Smart Grid Security, International Symposium on Engineering Secure Software and Systems*, Munich, Germany, February 2014
57. Cristina Rottondi, Marco Savi, Daniele Polenghi, Giacomo Verticale, and Christoph Krauss "A Decisional Attack to Privacy-friendly Data Aggregation in Smart Grids" *GLOBECOM 2013, IEEE Global Communication Conference*, Atlanta, Georgia, December 2013
58. Cristina Rottondi and Giacomo Verticale "Privacy-Friendly Appliance Load Scheduling in Smart Grids" *SmartGridComm 2013, IEEE International Conference on Smart Grid Communications*, Vancouver, Canada, October 2013
59. Cristina Rottondi, Giacomo Verticale, and Christoph Krauss "Secure Distributed Data Aggregation in the Automatic Metering Infrastructure of Smart Grids" *ICC 2013 - IEEE International Conference on Communications*, Budapest, Hungary, June 2013
60. Cristina Rottondi, Marco Savi, Daniele Polenghi, Giacomo Verticale and Christoph Krauss "Implementation of a Secure Protocol for distributed Aggregation of Smart Metering Data" *SGTEP, IEEE International Conference on Smart Grid Technologies, Economics and Policies*, Nuremberg, Germany, Dec. 2012
61. Cristina Rottondi, Giulia Mauri and Giacomo Verticale "A data pseudonymization protocol for smart grids" *GreenCom, Online Conference on Green Communications*, Sep. 2012.
62. Maddalena Binda, Cristina Rottondi, Antonio Iacchetti, Luca Beverina, Dario Natali, and Marco Sampietro "Organic PhotoDetector directly deposited onto a Plastic Optical Fiber" *SOPO2012, Symposium on Photonics and Optoelectronics*, Shanghai, China, May 2012

63. Cristina Rottondi, Giacomo Verticale and Antonio Capone “A security Framework for Smart Metering with Multiple Data Consumers” *1st IEEE INFOCOM CCSES Workshop on Green Networking and Smart Grids*, Orlando (Florida USA), March 2012
64. Cristina Rottondi, Francesco Puleio, Shalini Raavi, Massimo Tornatore, Achille Pattavina and Giancarlo Gavioli “On the Benefits of Elastic Transponders in Optical Metro Networks” *OFC/NOEFC*, Los Angeles Convention Center, Los Angeles, (California, USA) March 2012
65. Maddalena Binda, Cristina Rottondi, Antonio Iacchetti, Luca Beverina, Dario Natali, and Marco Sampietro “Organic PhotoDetector directly deposited onto a Plastic Optical Fiber: an integrated fiber/receiver system reaching 10MHz operation frequency” *PE2011, Plastic Electronics, Conference and Exhibition*, Messe Dresden Germany, October 2011
66. Cristina Rottondi and Giacomo Verticale “Using Packet Interarrival Times for Internet Traffic Classification” *IEEE LATINCOM, 3rd Latin-American Conference on Communications*, Belem (Para’, Brazil), October 2011
67. Cristina Rottondi and Giacomo Verticale “A Novel Technique for Automatic Packet Traffic Classification” *Sessione Scientifica GTTI*, Messina/Taormina (Italy), June 2011
68. Stefano Bregni, Diego Lucerna, Cristina Rottondi, and Giacomo Verticale “Using per-Source Measurements to Improve Performance of Internet Traffic Classification” *IEEE LATINCOM, 2nd Latin-American Conference on Communications*, Bogota’, Colombia, October 2010
69. Diego Lucerna, Cristina Rottondi, and Giacomo Verticale “Using per-Host Measurements for Fast Internet Traffic Classification” *Sessione Scientifica GTTI*, Brescia (Italy), June 2010

Book chapters

- C1 Antimo Barbato, Cristina Rottondi, and Giacomo Verticale, “Multi-User Demand Side Management in Smart Grids”, Chapter 9 in *Smart Grid: Networking, Data Management, and Business Models* edited by Hussein T. Mouftah and Melike Erol-Kantarci, CRC Press, Taylor & Francis Group, ISBN 9781498719704, April 2016
- C2 A. Castelletti, A. Cominola, A. Facchini, M. Giuliani, P. Fraternali, S. Herrera, M. Melenhorst, I. Micheel, J. Novak, C. Pasini, A.E. Rizzoli and C. Rottondi , “Gamified approaches for Water Management Systems: an Overview”, *Water Smart Grids - A Cyber-physical Approach* edited by Prof. Panagiotis Tsakalides, Dr. Athanasia Panousopoulou, Dr. Grigorios Tsagkatakis and Dr. Luis Montestruque, CRC Press, Taylor & Francis Group, ISBN 9781351986175, March 2018
